

News Release....

Esponjinha Ltd in Portugal, NoWet® for Portugal & Spain, has joined the group of companies associated with NoWet Waterless CarClean (International) Pty Ltd.

22 February, 2009

The Directors of a previous long time distributor for a USA company, Esponjinha, have made the informed decision to join the group of companies associated with Australian based NOWET International.

They experienced, as NOWET Waterless CarClean in Australia did, broken promises and no co-operation from the USA company. *See Letter of Trust*

For example the USA company appointed two other “exclusive” distributors in the same “exclusive” territory of Esponjinha. NoWet Waterless CarClean was charged a very large licensing fee as well as a massive product price increase of nearly 20% instead of a maximum 3% per annum as agreed to. We are all relieved to be free from this past unhappy experience.

It comes at the right time with having the improved formula for NOWET in hand. By manufacturing in Australia, supplies are guaranteed as well as having stable pricing on which to build the future with confidence.

We sincerely welcome everybody at Esponjinha, in joining forces with the highly professional and ethical group associated with NOWET International. We are all looking forward to working together in making NOWET® an even stronger brand in the environmental automotive cleaning industry around the world.

The comprehensive website of Esponjinha - NOWET® Portugal and Spain, known as “The Librarian Peninsula”- is: <http://www.nowet.pt>.
