Dear Andrew

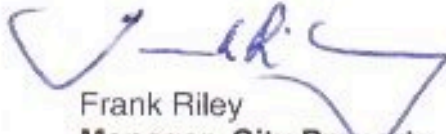

Re: NoWet Waterless Car Clean Product

The Brisbane City Council, BAC Car Pool first trialed the "NoWet Waterless Car Cleaning product in September 2005, following a recommendation by staff to search for a cleaning solution which minimised water usage for our fleet of 70 vehicles based in the City.

By using the NoWet waterless spray on application, significant water savings were realised and the appearance of the vehicles were improved by the paint protection qualities of the product. Labour savings were experienced as the vehicles required less cleaning following the initial product applications.

The Brisbane City Council BAC Car Pool doing this trial have been pleased with the results, and are positive towards its continued use, as they have ceased using water to wash vehicles and improved the appearance of the vehicles.

Yours sincerely

Frank Riley
Manager, City Property
Brisbane City Council
